WE ARE RECRUITING

Specialist Veterinary Radiologist

Full time or part time | On site in Miranda, Sydney, Australia

On-site 1.5T MRI, 64-slice CT and interventional radiology.
An independently owned hospital where innovation has no boundaries.

Veterinary Specialists of Sydney (VSOS) is seeking an on-site specialist radiologist to join our diagnostic imaging team, full time or part time, as we grow our diagnostic imaging department. We are an independently owned specialist and 24-hour emergency hospital with an energetic, enthusiastic team that keeps improving. This is a rare chance to be an in-house radiologist at the centre of a busy multidisciplinary hospital, with the modalities, caseload and support to build a department you are proud of. If you are drawn to innovation and want to help shape what veterinary imaging can achieve in Australia, we would love to talk with you.

Why radiologists choose VSOS

- **Help build the department.** Join us as we bring specialist radiology in house. You will help shape imaging protocols, reporting standards, workflow and the direction of the service, with a leadership team committed to its growth.
- **Premium modalities under one roof.** On-site 1.5T MRI, 64-slice CT, mobile C-arm fluoroscopy, digital radiography and ultrasound, within a 24/7 hospital, so urgent cases can be imaged and acted on without delay.
- **Interventional radiology.** Our interventional radiology team works alongside human interventional radiologists on minimally invasive procedures, including urinary tract stenting, interventional oncology and arterial embolisation. Our team has performed a world-first elbow embolisation for arthritis in a dog.
- **A varied, complex caseload.** Image patients for our specialists in cardiology, neurology, surgery, internal medicine, anaesthesia, emergency and critical care and rehabilitation, as well as outpatient imaging referrals from veterinarians across Sydney.
- **Supported to focus on imaging.** A dedicated imaging department manager and imaging team, with our specialist anaesthesia team and ICU for sedation and general anaesthesia, so you can concentrate on image quality and diagnosis.
- **Room to innovate.** Bring your ideas, new procedures and clinical interests. Our motto is Beyond possible, and we live and breathe it every day.
- **A stake in our future.** We have introduced an equity scheme so VSOS can remain independently owned, with invitations extended to senior clinicians and leadership staff.

Your package at a glance

Base salary	Attractive and tailored to your experience and contribution
Superannuation	Paid on top of your base salary
Equity	Opportunity to be invited into the VSOS equity scheme
Continuing education	Two weeks of CE leave, plus a CE allowance on top

Working pattern	Full time or part time, based on site in Miranda, with roster and clinical scope discussed individually

Equipment to support advanced diagnostic imaging

- Siemens MAGNETOM Sempra 1.5T MRI, on site for urgent and elective studies.
- Siemens SOMATOM go.Up 64-slice CT scanner, with CT angiography capability.
- Philips Zenition 70 mobile C-arm fluoroscopy for interventional radiology and dynamic studies.
- Siemens MOBILETT Elara Max mobile digital radiography.
- Philips EPIQ Elite Advanced ultrasound system for abdominal, thoracic and soft tissue imaging and image-guided procedures.
- Philips EPIQ CVx cardiovascular ultrasound system within our cardiology service.
- In-house pathology for rapid analysis of samples.
- Specialist anaesthesia team, dedicated ICU and fully equipped surgical suites.

Your role and clinical interests

- Perform and interpret MRI, CT, radiography, ultrasound and fluoroscopic studies for hospital, emergency and outpatient referral cases, with clear and timely reports for clinicians and referring veterinarians.
- Perform ultrasound and CT-guided fine needle aspirates, biopsies, centesis and drainage.
- Contribute to interventional radiology procedures, including planning, image guidance and follow-up imaging, according to your experience and interests.
- Act as the imaging consultant for our specialists and emergency team, helping choose the right study and protocol for each patient.
- Collaborate with cardiology, neurology, anaesthesia, surgery, internal medicine, emergency and critical care and rehabilitation colleagues.
- Help develop imaging protocols, reporting standards, quality assurance and the growth of the department, with scope to pursue interests such as neuroimaging, CT angiography, musculoskeletal imaging and interventional radiology.

Established specialists, newly qualified Diplomates and residency-trained candidates are welcome. We can shape the clinical scope around your expertise and goals.

About you

You hold Diplomate ACVR, Diplomate ECVDI, FANZCVS (Veterinary Radiology) or an equivalent recognised qualification, with eligibility for veterinary registration and specialist registration in NSW. Residency-trained candidates working towards board certification are also encouraged to apply. You bring sound clinical judgement, kindness, a collaborative approach and a genuine curiosity for innovation.

Make Sydney your next move

Enjoy Cronulla's beaches, the Royal National Park and Sydney's cultural life. Australian and international applicants are welcome.
